DETAILED ACTION

Previous rejections that are not reiterated herein are withdrawn.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 6,8,9,16 remain rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for synergistic fungicidal mixtures comprising a triazolopyrimidine derivative of formula I and an acryloylmorpholide of formula II while not being enabling for applying the triazolopyrimidine of formula I and acryloylmorpholide of formula II to fungi separately or successively to fungi to produce synergism. To make and test the application of formula I and formula II to the fungi separately or successively to determine synergy would create undue burden on artisan in the field.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 6,8,9,16 remain rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 6,8,9,16 recite the limitation "applied ... separately, or in succession". In claim 1, from which the claims depend, is to a fungicidal mixture. A mixture does not allow for separate or successive application of ingredients contained therein. There is insufficient antecedent basis for this limitation in the claim.

Allowable Subject Matter

Claims 1-5,7,10-15,17,20,21 are allowable. On pages 11-12 of the specification, Applicant provides synergistic data for compositions comprising the triazolopyrimidine of formula I and acryloylmorpholide of formula II.

Response to Arguments

Applicant's arguments filed 1/4/07 have been fully considered but they are not persuasive. Applicant argues that the present claims satisfy the enablement requirement in that all of the claims require the formation of a "mixture" of the compounds of formula I and III, whether the mixture is formed before application or after application on fungal habitat, seed, soil or plant upon which the compounds can be applied separately or successively. Applicant argues that the recitation in claim 1 that compounds are in a mixture makes it clear that a mixture of the compounds must exist at some point, before or shortly after application onto the desired target substrate. Examiner agrees with applicant in that claim 1 requires a mixture. However, the claim does not recite "a mixture makes it clear that a mixture of compounds must exist at some point, be it before or shortly after application onto the desired target substrate".

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 1616

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
